

MARCH INTO MATH:

Fun & Engaging Math
Strategies for Home

Hello I'm:

Dr. Velvet Smith
Sped Parent Resource
Center Liaison

Agenda

- Discover the joy and importance of math in everyday life.
- Simple strategies to create a positive math environment at home.
- Engage with math through hands-on activities and interactive games.
- Support and enhance your child's classroom learning experience.

10

1

Creating a **Positive** Math Environment

Positive Attitudes: Model enthusiasm and a can-do attitude towards math challenges. Avoid negative math talk.

Everyday Math: Involve your child in daily activities with a math twist—cooking, shopping, and playing sports can all include fun math lessons.

Visual Supports: Decorate with educational posters, like multiplication tables or geometric shapes, to make math a regular part of your home.

Learning Through Play

Hands-On Math: Use household items for counting and sorting games. Measure items around the house to learn about length.

Board and Card Games: Incorporate games that require strategic thinking and math skills, like "Monopoly" for money management or "Uno" for pattern recognition.

DIY Math Games: Create a "Math Jeopardy" game with categories like addition, subtraction, and word problems. Make math part of family game night!

3

Reinforcing School Math at Home

Homework Routine: Establish a regular, distraction-free homework time and space. Encourage independence, offer guidance rather than answers.

Tackling Challenges: Approach difficult topics with patience. Break down problems into smaller, manageable parts. Use online resources for alternative explanations and practice.

Teacher Partnership: Stay in regular contact with your child's math teacher for insights and tips. Attend school math events to show your support and interest.

Resources for Math Mastery

Apps and Websites: Apps on Google Play, Apple Store
Websites such as Khan Academy, Prodigy Math Game, YouTube

Books and Workbooks: Select book that have math themes, math work books from Dollar Tree, Five Below, Amazon

Community Resources: Library Events, School Tutoring

THANK YOU!!!
